TRIOS INTRAORAL SCANNERS

Five generations of innovation in digital dentistry

Image: TRIOS 5

Form edits:

- Check box "I agree to receive communications from Argen"
- Option to choose if "Dental Lab / Dentist / Denturist"
- Field to "Clinic or Lab Name"
- Instead of Zip Code - Province

Text after the Form: *Argen is a trusted TRIOS reseller in Canada since 2013!*

Edits:

Title: TRIOS SCANNERS OPTIONS

Image: TRIOS5, TRIOS4, TRIOS3, TRIOS CORE

Images Functionality:

- When positioning the mouse over each image it appears **more info** about the scanner.

Scanners more info:

- **TRIOS5:**

Hygienic by Design: Sets a new standard in infection control.

Compact & Ergonomic: Smaller, lighter, and fits perfectly in every hand.

Advanced Performance: Features the new AI ScanAssist engine for flawless results.

Ultimate Connectivity: Includes TRIOS Share for seamless integration.

Effortless Scanning: Simply hygienic, ergonomic, and efficient—Simply TRIOS 5!

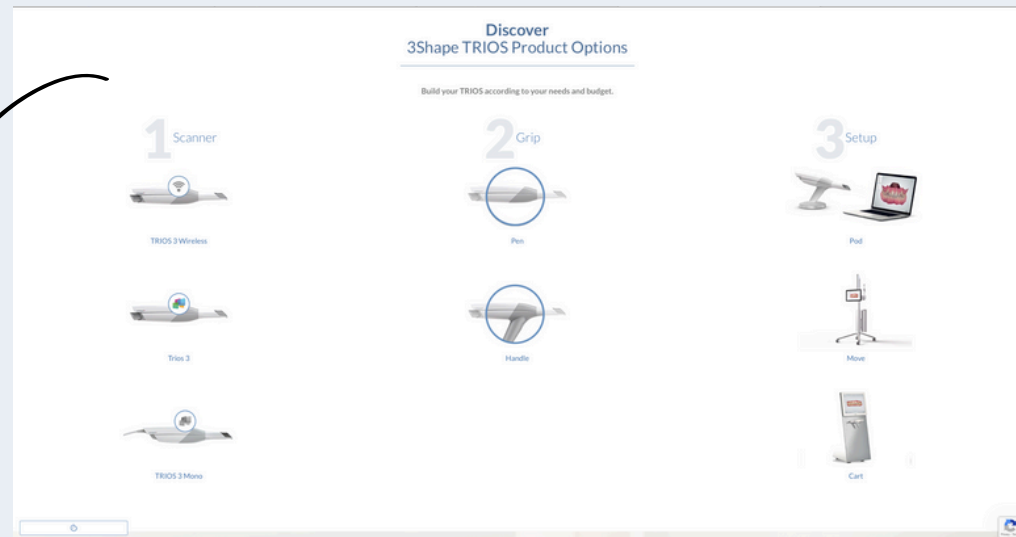

- **TRIOS4:**

Flexible Scanning Options: Wireless with TRIOS Share or plug-in convenience.

Instant-Heat SmartTips: Scan-ready in seconds with next-gen technology.

Advanced Patient Monitoring: Detect wear, tear, and caries with the TRIOS Patient Monitoring app.

Consistent Excellence: Deliver great impressions every time!

- **TRIOS3:**

Proven Performance: Trusted by tens of thousands of dentists worldwide.

Accurate Scans: Capture precise, scan-and-send impressions.

Realistic 3D Colors: Enhance visualization with lifelike imaging.

Enhanced Pod Design: Smaller, lighter, and fewer cables for convenience.

Engagement Tools Included: Comes with three interactive apps.

- **TRIOS CORE:**

Essential & Affordable: Award-winning TRIOS technology streamlined.

AI-Powered Scanning: Delivers exceptional accuracy and speed.

Seamless Lab Sharing: Share scans with one click.

Reliable Performance: Core excellence at an accessible price.

Title: User Experiences with TRIOS Scanners

Images containing testimonials

"The 3Shape TRIOS 3 wireless intraoral scanner from Argen Canada has been an amazing addition to my dental practice. Clinically my restorations are more accurate and I get better occlusion with minimal remakes. My patients love this technology and have a very comfortable treatment experience - no more 'goop' in their mouth and no more gagging. I couldn't practice without it."

Dr. Brent Corlazzoli, D.M.D, Kelowna BC, Canada.

"The 3Shape TRIOS scanner from Argen Canada is a revolutionary tool that simplifies the most complex workflows in my office. It saves time, is very accurate and is very easy to operate. This technology truly brings innovation and solutions to simplify traditional complex dental workflows! Trust me... get it and you will not regret it! And, patients love it - no more mess or gagging! There is no way I would go back to traditional impressions."

Dr. Elie El Jebailey
D.M.D. Lachenaie, Québec

Title: Why Argen Digital Dentures?

Perhaps we can highlight each topic and use the same functionality as the TRIOS Scanners to display the description for each. Open to ideas and suggestions!

Digital Production & Superior Materials

- Experience cutting-edge milling and 3D printing technologies, regulated production methods, and trusted materials to create digital dentures with exceptional fit, superior strength, and long-lasting durability. Designed for outstanding aesthetics and reliability.

Safety & Traceability

- Benefit from Health Canada-registered medical devices with full traceability, ensuring compliance, patient safety, and consistent quality you can trust.

Case Submission & Support

- Utilize "Argen Digital," our award-winning digital case submission system, to streamline production. Easily submit cases, track progress, view order history, and manage financials. Enjoy comprehensive technical support for a hassle-free digital experience.

24/5 Production & Efficacy

- Keep your denture cases in production around the clock, five days a week, from your design file, ensuring faster turnaround times and greater efficiency for your business.

Images: Icons to represent each benefit.

Title: Product Offerings

Milled Dentures

- STANDARD UNASSEMBLE DENTURES

LEARN MORE (is it possible to be a pop-up box with the “learn more: info?”):

Fabricated from Argen PMMA Discs and expertly milled with the DGShape DWX-53D. With a rapid 2-day turnaround, our dentures combine high-quality materials with unmatched precision.

- PREMIUM ASSEMBLE DENTURES

LEARN MORE:

Crafted with precision, this bonded overmill process combines ArgenDS HI-Base High Impact Acrylic Denture discs and ArgenPMMA Multilayered discs to deliver high-quality, lifelike dentures with exceptional accuracy.

Printed Dentures & Partial

- ASIGA TRY-IN DENTURE

LEARN MORE

Minimize appointments and secure approvals faster! Made with Asiga DentaTry material, our 3D Printed Try-Ins are easily adjustable for an optimal fit and exceptional aesthetics.

- LUCITONE TRY-IN DENTURE

LEARN MORE

Experience 3D Printed Lucitone Try-In Dentures that combine aesthetics with lasting durability. Available in the six most popular A–D shades for seamless integration.

- Lucitone Printed Denture

LEARN MORE

Elevate your practice with Premium Printed Dentures from Argen, crafted with high-impact denture resin and cutting-edge printer technology, eliminating the need for costly equipment while streamlining workflows to reduce patient visits and simplify reorders for increased profitability.

- SLM RPD

LEARN MORE

Save time and enhance accuracy with no need for casting. Argen’s SLM RPD Frames are crafted with a uniquely formulated blend that is more accurate and ductile than traditional casting. Our proprietary post-processing ensures a precise fit every time. Outsource to Argen and eliminate the headaches of traditional casting.

Product Offerings

The removable full-arch dentures are available in a variety of gingiva and teeth shades. Argen offers easy file upload and quick turnaround times for accelerated production. Now that's a reason to smile.

Title: Related Products

- **Precision Milled Titanium Bars**

LEARN MORE (is it possible to be a pop-up box with the “learn more” info?):

Milled Titanium Bars, made from Grade 23 titanium, are designed for fixed and removable dentures at the abutment level, compatible with most multi-unit abutments, and available for multiple implant sites in various bar styles, with optional polishing, anodization in pink or gold, and a 3-day turnaround for files submitted by 3:00 p.m. PST (6:00 p.m. EST).

- **ArgenZ High Definition Milled Zirconia Bridge**

LEARN MORE

ArgenZ High Definition Milled Zirconia bridges offer enhanced interproximal definition, improved gingival detail, and the same translucency as HT+ Multilayer, with 45% translucency, 1250 MPa, and availability in crown, screw-retained, and full-arch cases; files must be submitted by 12:00 p.m. PST (3:00 p.m. EST) for a 3-day turnaround.

- **PMMA Denture Teeth Screw Retained Bridge**

PMMA Screw Retained Bridges, suitable for implant bridges, are screw-retained yet retrievable, available with or without gingival anatomy, and compatible with third-party implant parts, with a 2-day turnaround for 2-14 unit cases when files are submitted by 3:00 p.m. PST (6:00 p.m. EST).

- **ArgenIS Multi-Unit Ti Base & Screw Set**

LEARN MORE

ArgenIS Multi-Unit Abutment Ti Bases, made from medical-grade 5 ELI Titanium, come with a screw, multiple chimney heights, and universal RP sizing for all ArgenIS Multi-Unit abutments, ensuring precision and durability for diverse clinical needs.

- **Rodin Palette Naturalization Kit**

LEARN MORE

Rodin™ Palette Naturalization Kit uses advanced nano-technology to deliver a delamination-free bond and a wide range of colors for replicating natural tooth and gingiva features, offering wear resistance, stunning accuracy, and compatibility with ceramic resin restorations when used with a nitrogen-based curing system.

- **Precision 3D Printed Model**

LEARN MORE

A versatile and reliable solution for creating high-quality dental models with precise and durable features tailored to your specific needs.

Options:

Model C

Model C printed models, created from intraoral scans and made with light-cured resin, feature a smooth surface finish and are available from single die to full arch. With a fast 2-day turnaround and STL file compatibility, your lab can offer a complete digital workflow from scan to restoration; files must be submitted by 3:00 p.m. PST (6:00 p.m. EST).

Model A

Model A printed models, crafted from intraoral scans using Asiga DentaMODEL resin, deliver smooth surface finishes and are available from single die to full arch. Offering next-day turnaround for most GTA locations (2-day turnaround for locations outside GTA) and STL file compatibility, these models ensure a seamless digital process from scan to restoration; files must be submitted by 5:00 p.m. EST (2:00 p.m. PST).

ARGEN MODEL PRO RESIN

Highly accurate models at incredible speeds.

Argen Model Pro prints more accurately and in less time than leading resins, boosting productivity and results. With only 250 flashes per side required to cure compared to the 2,000 flashes most resins need, it saves nearly 6 minutes per cure. Its neutral color is specifically engineered for ceramics, ensuring unmatched color accuracy with your restorations.

BULLETS:

- Compatible with multiple 3D printers and post-cure units
- Removable, crown and bridge, and dental orthodontic models
- Color options: Neutral Grey and Sandstone
- Available in a 1Kg bottle.

KEEP: Shop Now and Contact Us.

ARGEN FLEX RESIN

Durable, flexible, and precise for a wide range of dental appliances.

Argen FLEX 3D Printing Resin is a strong, biocompatible resin that is ideal for printing night guards, occlusal splints and a variety of orthodontic and dental appliances. Argen FLEX is flexible, easy to polish and stain resistant.

BULLETS:

- Validated for multiple open-source 3D printers
- Printer Compatibility: 385nm and 405nm
- Health Canada Medical Device

KEEP: Shop Now and Contact Us.
